

The Actuarial FOUNDATION

The Actuarial Foundation's Board of Trustees is honored to recognize Robert Shapiro, FSA, MAAA, for his lifelong commitment to our mission of enhancing math education and financial literacy through the talents and resources of actuaries.

As one of the Founding Members of The Actuarial Foundation, Bob's visionary leadership, dedication and enthusiasm for serving others has made a difference in the lives of so many and has ensured that the programs of the Foundation will continue to inspire students and future actuaries for years to come.

Bob originated and served on multiple education and scholarship committees for the Foundation. He was instrumental in building the highly successful Advancing Student Achievement Program, an educational program aimed at teaching underserved students the importance of math skills. Bob and his wife, Karen, served as Lead Mentors for this and several other educational initiatives, generously sharing their love of math with countless young students and contributing to a new generation of math-skilled thinkers.

As Bob once said, "The Actuarial Foundation is a critical component of the actuarial profession and its values." It is our privilege to recognize Bob for his exemplary commitment to the Foundation, the actuarial profession and all those we serve. He leaves an incredible legacy that The Actuarial Foundation is proud and committed to continuing for decades to come.
