

The 2025 Modeling the Future Challenge Symposium will be held virtually via Zoom on April 28 – May 2, 2025.

The Modeling the Future Challenge (MTFC) Symposium opens with our MTFC Undergraduate Interns Career Panel to help students connect with and learn from preservice actuaries, Finalist Team introductions, and an interactive team activity. The middle three days of the Symposium will be the individually assigned Judging Sessions for the Finalist teams. The Closing Symposium & Awards Announcement will include an interactive session with Challenge Sponsors followed by the Closing Ceremony and the presentation of our scholarship award winners.
