FOUNDATION

Why Partner With Us?

Our mission is to unleash the power of math education and transform futures by leveraging the talents and resources of the actuarial community. Here's how we're improving math proficiency and why it's significant.

Starting Early

Our initiatives begin engaging students early in their math journey, from elementary school through college, to maximize long-term impact.

Strengthening the Profession

Supporting our organization enhances the industry's involvement in service, giving, and social responsibility while strengthening its reputation. For companies, it demonstrates a commitment to community and education, and individual actuaries are empowered to give back to the profession by directly contributing to the success of future generations.

Proven Impact

Our programs have transformed the lives of more than 10,000 students annually by boosting their math confidence and proficiency, opening the door to stronger academic performance and heightened career opportunities.

Scalable Solutions

With our extensive network of volunteers and partners, we provide scalable solutions that reach students in different communities, supporting learners nationwide and working to ensure that no one is left behind.

Our Impact

Over the past thirty years, our impact has rippled through countless lives. With each additional partnership, we can reach even more students, expanding the impact of our programs.

George Stock, Math Motivators Tutoring Program Volunteer

“Seeing students engaged in their learning is rewarding. Being able to provide that individual help that so many students need, but do not always get in a regular classroom setting, was fulfilling.”

Will Guo, Modeling the Future Challenge Participant

“I was fortunate to be selected for the Climate Resilience Award, a partnership between The Actuarial Foundation and the Sempra Foundation. It was an incredible experience that improved not only my math abilities but also my presentation skills and confidence in applying math to real-world issues.”

Eliana Amaro, Hardest Math Problem Participant

“This challenge has helped me to understand how math can be useful in our everyday life. The problems that I had to solve were fun and engaging since they were real world problems, like the impact of social media.”

Patrick Reagan, STEM Stars Actuarial Scholars Program Participant

“I’m excited to be able to connect with like-minded peers, people who also want to be an actuary, and people I might work with. And also, being able to connect and learn from a mentor who’s traveled down a path that I wish to take.”

About The All for Math Campaign

Through the All for Math Campaign, we're bringing together the entire actuarial community to ensure that students everywhere build confidence and proficiency in math.

In its first year, All for Math inspired actuaries nationwide to take action, supporting tutoring, scholarships, and competitions that helped students strengthen their math skills and discover new possibilities for their futures. The campaign built a strong foundation of engagement, generosity, and enthusiasm within the actuarial community.

Now in Year 2, we're taking that momentum even further with the **\$75,000 Impact² Challenge**, where every gift from a new donor will be matched, doubling the difference each contribution makes. Our goal is to expand participation across the profession, encouraging even more actuaries to get involved as donors and volunteers to increase opportunities for students through math education.

The All for Math Campaign aims to significantly increase engagement among actuaries in support of our programs. By engaging more actuaries as donors and volunteers, together we can dramatically amplify our impact.

Share Your Love of Math!

2026 All for Math Sponsorship Levels

As a sponsor, your company will be recognized as a key supporter of math education, equipping students with vital problem-solving and critical thinking skills, and opening doors to their futures. We understand that each company has unique goals, and we are eager to work with you to craft a sponsorship package that aligns with your objectives. A sample appears below. Your specific visibility and exposure will be based on your level of support.

Benefits & Giving Levels	Logo/Name Recognition	Social Media Post	STEM Stars Corporate Advisory Council	Foundation News Article	Podcast
Infinity Sponsor \$100,000 and up	Logo	✓	✓	✓	✓
Equation Enthusiast \$50,000 - \$99,999	Logo	✓	✓	✓	
Probability Partner \$25,000 - \$49,999	Logo	✓	✓		
Integral Investor \$10,000 - \$24,999	Name	✓			
Number Nurturer Up to \$9,999	Name
